STATE of WISCONSIN

Federal Fiscal Year 2006

HIGHWAY SAFETY PERFORMANCE PLAN

A. EXECUTIVE SUMMARY

VISION

Zero fatalities. Wisconsin does not tacitly accept deaths and injuries; its citizens and state policy makers work toward achieving zero fatalities and incapacitating injuries on our roadways. We do not define casualties as a negative but largely accepted side effect of a transportation system that is essential to our society's continuing prosperity; instead our 'zero vision' can be thought of as "saving the maximum number of people using the resources available."

MISSION

<u>Statewide Highway Safety Coordination</u>: The Bureau of Transportation Safety coordinates a statewide behavioral highway safety program, making effective use of federal and state Highway Safety funds and other resources, and provides leadership, innovation and program support in partnership with traffic safety activists, professionals and organizations to save lives and reduce injuries on Wisconsin roads.

STATE GOAL

By 2008, Wisconsin mileage fatality rate will be 1.0 per 100 MVMT.

In order to achieve the goal of 1.0 deaths per 100 MVMT in 2008, Wisconsin must decrease its crash deaths to 670 from the 2000 baseline of 801 deaths, assuming a straight-line increase in mileage traveled. Of the driver causes of crashes, decreases in speeding and impaired driving, paired with increased safety belt use, offer the greatest opportunity to attain this goal.

PERFORMANCE MEASURES

| STATE PE | STATE PERFORMANCE MEASURES | | | | | | | | | | | |
|------------------------------|----------------------------|--------|--------|--------|--------|--|--|--|--|--|--|--|
| | CY2000 | CY2004 | CY2006 | CY2008 | CY2010 | | | | | | | |
| Deaths | 801 | 784 | 730 | 670 | 650 | | | | | | | |
| Mileage Death Rate | 1.4 | 1.3 | 1.15 | 1.0 | 0.9 | | | | | | | |
| Population Death Rate | 14.09 | 14.2 | 13.0 | 11.8 | 11.3 | | | | | | | |
| Mileage KA Rate | 9.99 | 10.0 | 8.9 | 8.3 | 7.9 | | | | | | | |
| Safety Belt Use Rate | 65.4 | 73% | 76% | 81% | 83% | | | | | | | |
| Alcohol crash fatalities | 301 | 326 | 310 | 300 | 290 | | | | | | | |
| Speed crash fatalities | 231 | 261 | 240 | 230 | 220 | | | | | | | |
| 15-24 y/o killed in crashes | 203 | 216 | 200 | 193 | 179 | | | | | | | |
| Motorcycle rider fatalities | 78 | 80 | 77 | 75 | 72 | | | | | | | |
| Pedestrian fatalities | 50 | 56 | 54 | 50 | 47 | | | | | | | |
| Bicycle crash fatalities | 10 | 14 | 12 | 10 | 8 | | | | | | | |
| Large truck crash fatalities | 112 | 111 | 103 | 95 | 90 | | | | | | | |

Note: Adding up the various program fatality goals in this table will provide a total greater than the total state fatality goal (670 by 2008). The overlapping effects of the individual programs that result in counting deaths more than once. The fatalities are organized by priority program areas (e.g., alcohol) as well as by vehicle type (eg. Motorcycles) and by target population (e.g., 15-24 y/o). Thus the death of an 18-year old impaired motorcyclist may appear in three categories.

B. HIGHWAY SAFETY PLANNING PROCESS

1. Define and Articulate Problems

<u>January -- April -- Obtain and Analyze Information and Data</u>: Prior calendar year crash data are available by April. The most recent 10 years of crash data are used to determine the magnitude of the problem posed by each crash type and to develop trend lines. In addition, conviction, medical, demographic, survey, program effectiveness and other relevant data are analyzed and used, as appropriate, to generate rates, disproportionate representation of subgroups, trends, etc., for each program area.

<u>August-April -- Obtain Partner/Stakeholder Input</u>: Each program expert obtains formal and informal recommendations, resources, and information from traditional and non-traditional partners and stakeholders, including public health, emergency medical services, enforcement and adjudication, not-for-profit organizations, businesses and community coalitions. This activity continues throughout the year.

2. Set Performance Goals and Objectives/Performance Measures

<u>April -- Select Measures and Establish Degree of Change Over Time</u>: Evaluate nature and magnitude of each type of state-level and program area problem and each target location or group, establish effectiveness of proposed program activities in addressing the problem, determine availability of resources to be applied to the problem and availability of data and information to be used to determine progress toward goals.

<u>Continuing -- Coordinate with Other Plans</u>: The annual highway safety plan is coordinated with state and national strategic plans and related operational plans and guidelines, and especially with the WisDOT 2004-09 Strategic Highway Safety Plan, the 2006-2010 Wisconsin Traffic Records Strategic Plan and the Wisconsin Public Health Plan for the Year 2010.

The ten items of highest priority in the Department's 2004-08 Strategic Highway Safety Plan are listed in priority order below (HSPP-related goals bolded):

- 1. Increase seat belt use/air bag effectiveness
- 2. Improve design/operation of intersections
- 3. Improve data/decis ion support systems
- 4. Reduce speed-related crashes
- 5. Reduce impaired driving
- 6. Minimize consequences of leaving roadway
- 7. Design safer work zones
- 8. Reduce head-on and cross-median crashes
- 9. Keep vehicles on the roadway
- 10. Increase driver aware ness

<u>Continuing -- Coordinate with National Priorities and funding regulations</u>: Priority is given to Dr. Runge's February 2005 Motor Vehicle and Highway Safety Priorities, as well as the safety priorities and goals of FHWA and FMCSA, as appropriate.

3. Identify, Prioritize and Select Programs and Projects

<u>January-March</u> -- Evaluate and Adjust Prior Year Projects: During the first quarter of each year, BOTS program experts review the prior year's data and study the effectiveness of prior year projects. They also perform literature reviews and review best practices from other states. Continuing activities that are determined to have been effective are funded at progressively decreasing federal share.

<u>January-March</u> -- <u>Incorporate Assessment Recommendations</u>: Recommendations from state program assessments such as the 2001 EMS Assessment, 2003 Impaired Driving Assessment, 2005 Traffic Records Assessment and 2003 Motorcycle Safety Assessment are integrated into the funded activities of each program.

<u>Continuing -- Review Literature and Best Practices</u>: BOTS program experts perform literature reviews and also examine best practices from other states to determine whether they suit Wisconsin's unique characteristics and should be included in the HSPP.

April-May -- Group Project Priority Setting: Each program expert brings information from the processes described above to a committee of the whole Bureau of Transportation Safety. The group examines data indicating the magnitude and severity of the problem in each program area, identifies areas of overlapping results for proposed activities, introduces partner organizations' priorities and opportunities for coordination. The group then determines which projects should be funded and the appropriate level of activity that will support the statewide goal and performance measures.

4. Articulate Objectives Relating to Goals, Set Objectives for Selected Activities

April-May -- Select Targets for Programs and Projects:

Process, impact and outcome objectives are developed for each program and project, depending upon the type of activity funded, and based upon historical success of that type of activity, the magnitude of the problem and the level of effort.

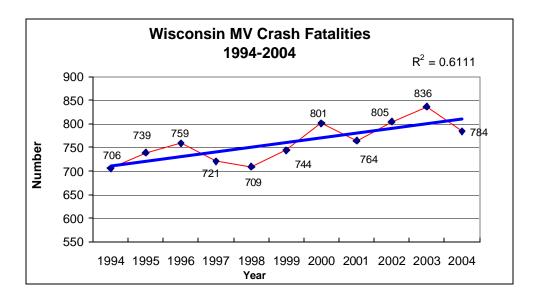

For each of these objectives and target areas, the analysts identify strategies for assessing the effectiveness of the selected projects and the availability of data at the right level of specificity collected at the right time and location.

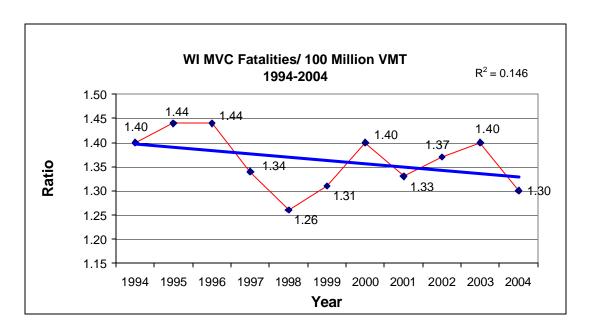

At the project level, high risk target populations, jurisdictions and behaviors are identified as in the following example: All alcohol and speed-related crash data from the three previous years for every jurisdiction in Wisconsin are analyzed, from those involving property damage, through all ranges of injuries, and those that resulted in death. These data are scientifically weighted, following established statistical protocol. From this work, the Bureau identifies those places in Wisconsin with the largest number of crashes due to excess alcohol use or speed. Upon factoring in each location's population density, a snapshot of the state's most likely places for similar crashes per capita is established.

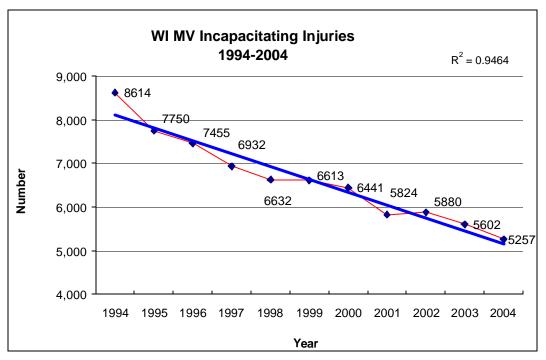

C. PROBLEM IDENTIFICATION --STATE SUMMARY MEASURES

The Problem ID Process is integral to the Planning Process described in Section B above. Information used in Problem ID includes WisDOT state crash, conviction, vehicle, roadway, traffic and survey data, BOTS program effectiveness studies, demographic and other census data, emergency department, hospital discharge and death data from the state Department of Health, national surveys and other relevant data. These data are used, as appropriate, in trend, factor, disproportion and other analyses of each program area. Results of problem identification are described in the Program Plans below.

At the state level, the number of deaths trends generally upward from 1994 to 2004, although the mileage death rate trends slightly downward. However, incapacitating injuries have decreased precipitously over the same period.

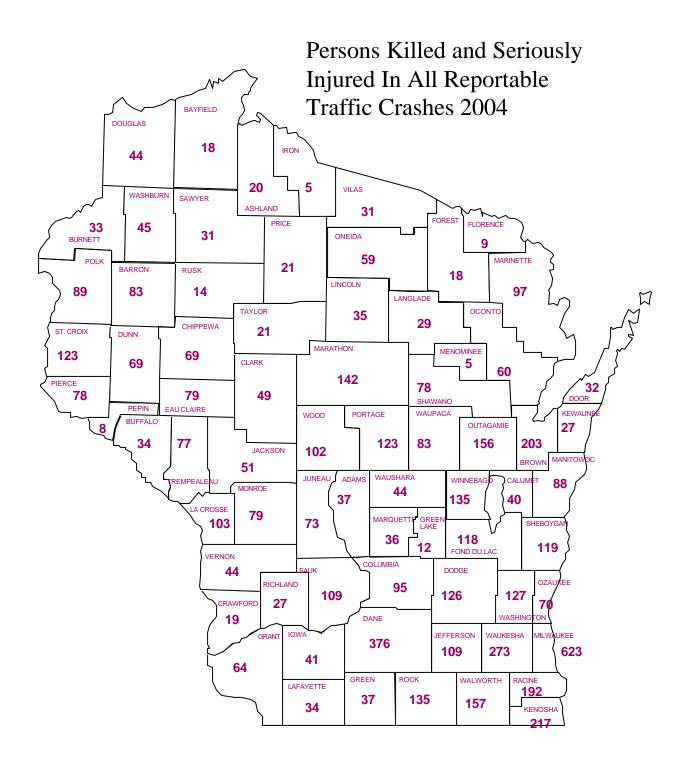

FINAL Year-End 2004 Crash Statistics

| | | | | | | | | | | | | 1994-96 | 2002-04 |
|-----------------------------------------|--------------|------------|--------------|--------------|-----------|--------------|--------------|--------------|-----------|--------------|-------------------------|--------------|--------------|

Recent Changes in Crash Reporting Threshold

| December 20, 1979 | - | Property damage threshold increased from \$200 to \$400 combined |
|-------------------|---|------------------------------------------------------------------|
| | | damage. \$200 threshold for government-owned property. |

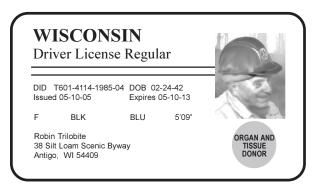

| July 31, 1981 | - | Property damage threshold \$500 to "any one person's property." \$ |
|---------------|---|--------------------------------------------------------------------|
| | | threshold for government-owned property. |

| April 19, 1988 | - | Property damage threshold \$500 to "any one person's property." |
|----------------|---|-----------------------------------------------------------------|
| | | Government-owned property changed to \$500 for government-ov |
| | | vehicles, and \$200 for all other government-owned property. |

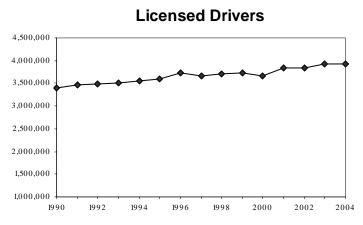

| January 1, 1996 | - | Property damage threshold changed to \$1,000 to "any one persor |
|-----------------|---|-----------------------------------------------------------------|
| | | property." Government-owned property changed to \$1,000 for |
| | | government-owned vehicles, and remained at \$200 for all other |
| | | government-owned property. |

The "reporting threshold" is the minimum set of criteria that must be met before a crash is considered to be reportable. The above represent changes to the reporting threshold over recent years. See the Glossary at the end of the book for a full definition of a "reportable crash".

The State of Traffic Crashes in Wisconsin

In 2004, there were 3,993,348 licensed drivers registered in Wisconsin.

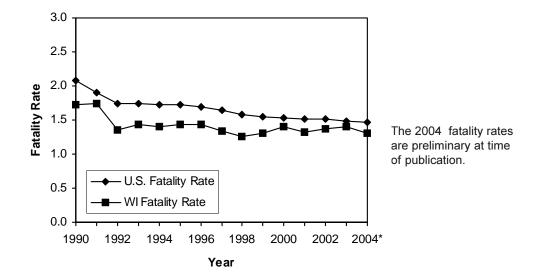

In 2004, approximately 60.5 billion vehicle miles were traveled in Wisconsin.

Vehicle Miles Traveled 70,000 60,000 50,000 Vehicle miles traveled is a preliminary estimate as of 40,000 publication. 30,000 20,000 10,000 1990 1992 1994 1996 1998 2000 2002 2004

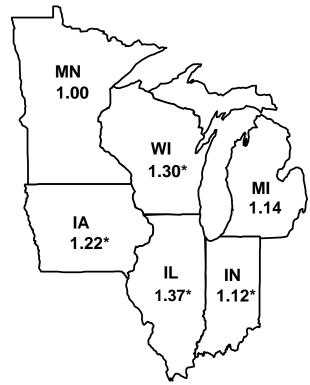

In 2004, there were 128,308 traffic crashes in Wisconsin.

Total Crashes 160,000 140,000 120,000 Property damage crash reporting threshold increased 1-1-96. 100,000 80,000 60,000 1990 1992 1994 1996 1998 2000 2002 2004

Wisconsin and U.S. Motor Vehicle Fatality Rates Fifteen Year Summary

Fatality Rates of Surrounding States

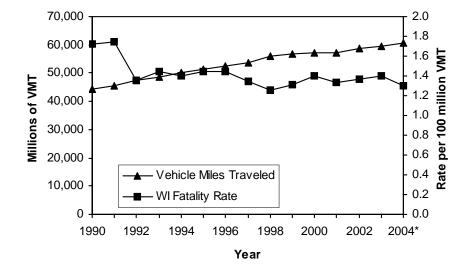

Fatality rate = deaths per 100 million miles of vehicle travel.

*National, Wisconsin, and Iowa fatality rates published here are preliminary estimates for 2004. Fatality rates published here for Illinois are final rates for 2003. The fatality rate noted for Indiana is preliminary for 2003. Michigan and Minnesota's figures are final for 2004.

Mileage Fatality Rates Fifteen Year Summary

| Year | U.S. Fatality Rate | Wisconsin Fatality Rate | Change in WI Fatality Rate | Estimated Motor Vehicle Miles of Travel | Change in VMT | Fatal Crash Rate | Change in Fatal Crash Rate |
|-------|-----------------------|----------------------------|-------------------------------|-----------------------------------------------|---------------|---------------------|----------------------------------|
| 1990 | 2.1 | 1.72 | -9.1% | 44,276 Million | 2.8% | 1.52 | -8.4% |
| 1991 | 1.9 | 1.75 | 1.7% | 45,456 Million | 2.7% | 1.48 | -2.5% |
| 1992 | 1.8 | 1.36 | -22.3% | 47,495 Million | 4.5% | 1.22 | -17.6% |
| 1993 | 1.7 | 1.44 | 5.9% | 48,805 Million | 2.8% | 1.26 | 3.3% |
| 1994 | 1.7 | 1.40 | -2.8% | 50,273 Million | 3.0% | 1.23 | -2.4% |
| 1995 | 1.7 | 1.44 | 2.9% | 51,395 Million | 2.2% | 1.28 | 4.1% |
| 1996 | 1.7 | 1.44 | 0.0% | 52,639 Million | 2.4% | 1.25 | -2.3% |
| 1997 | 1.6 | 1.34 | -6.9% | 53,729 Million | 2.1% | 1.17 | -6.4% |
| 1998 | 1.6 | 1.26 | -6.0% | 56,048 Million | 4.3% | 1.12 | -4.3% |
| 1999 | 1.5 | 1.31 | 4.0% | 56,960 Million | 1.6% | 1.18 | 5.4% |
| 2000 | 1.5 | 1.40 | 6.9% | 57,266 Million | 0.5% | 1.25 | 6.3% |
| 2001 | 1.5 | 1.33 | -5.0% | 57,266 Million | 0.0% | 1.19 | -4.7% |
| 2002 | 1.5 | 1.37 | 3.0% | 58,745 Million | 2.6% | 1.23 | 3.0% |
| 2003 | 1.5 | 1.40 | 2.2% | 59,617 Million | 1.5% | 1.25 | 1.9% |
| 2004* | 1.5 | 1.30 | -7.1% | 60,500 Million | 1.5% | 1.18 | -5.9% |

Fatality Rate and Vehicle Miles Traveled Fifteen Year Summary

Fatality rate = deaths per 100 million vehicle miles traveled.

^{*}National and state fatality rates and vehicle miles traveled published here are preliminary.

Fatal Crashes by Type of Crash and Manner of Collision

| | | Manner of Collision | | | | | | | | | | |
|-----------------------------|-------------------------------------------------------|---------------------|---------|----------|---------------------|-----------------|---------|-------|--|--|--|--|
| Type of Crash | No collision with motor vehicle in transport | Angle | Head on | Rear end | Side swipe opposite | Side swipe same | Unknown | TOTAL | | | | |
| Motor vehicle in transport | 11 | 154 | 72 | 32 | 19 | 11 | 2 | 301 | | | | |
| Fixed object | 229 | 1 | 2 | 0 | 0 | 1 | 0 | 233 | | | | |
| Overturn | 87 | 0 | 0 | 0 | 0 | 0 | 0 | 87 | | | | |
| Pedestrian | 39 | 4 | 3 | 1 | 0 | 1 | 1 | 49 | | | | |
| Deer | 11 | 0 | 0 | 0 | 0 | 0 | 0 | 11 | | | | |
| Bicycle | 5 | 3 | 1 | 1 | 0 | 0 | 1 | 11 | | | | |
| Other noncollision | 7 | 0 | 0 | 0 | 0 | 0 | 0 | 7 | | | | |
| Parked motor vehicle | 3 | 0 | 1 | 1 | 0 | 0 | 0 | 5 | | | | |
| Other object - not fixed | 3 | 0 | 0 | 0 | 0 | 0 | 0 | 3 | | | | |
| Train | 0 | 3 | 0 | 0 | 0 | 0 | 0 | 3 | | | | |
| Other animal | 2 | 0 | 0 | 0 | 0 | 0 | 0 | 2 | | | | |
| Motor vehicle other roadway | 0 | 0 | 1 | 0 | 0 | 0 | 0 | 1 | | | | |
| Immersion | 1 | 0 | 0 | 0 | 0 | 0 | 0 | 1 | | | | |
| TOTAL | 398 | 165 | 80 | 35 | 19 | 13 | 4 | 714 | | | | |

Persons Killed by Unit Type and Role

| Unit Type | Bicyclist | Driver | Motorcyclist | Moped User | Vehicle Passenger | Pedestrian | TOTAL |
|-----------------|-----------|--------|--------------|------------|----------------------|------------|-------|
| Automobile | 0 | 368 | 0 | 0 | 133 | 0 | 501 |
| Truck | 0 | 97 | 0 | 0 | 29 | 0 | 126 |
| Motorcycle | 0 | 0 | 80 | 1 | 0 | 0 | 81 |
| Equipment / Bus | 0 | 4 | 0 | 0 | 2 | 0 | 6 |
| Bicycle | 14 | 0 | 0 | 0 | 0 | 0 | 14 |
| Pedestrian | 0 | 0 | 0 | 0 | 0 | 56 | 56 |
| TOTAL | 14 | 469 | 80 | 1 | 164 | 56 | 784 |

Motorcyclist includes motorcycle drivers and passengers.

Unit type refers to the unit of the person killed. See the glossary for definitions of the unit types.

D. PROGRAM GOALS and PERFORMANCE MEASURES

Planning & Administration Performance Goal

Federal highway safety and related funds will be distributed into activities most likely to decrease the burden of crashes, deaths and injuries on Wisconsin roadways, and the effectiveness of funded and unfunded activities in meeting national, state and priority program goals will be evaluated and the results will be incorporated into future planning.

P&A Performance Measures

- Produce timely, accurate and complete plans and reports by December 2006.
- Administer planned activities by end of FFY2006.
- Incorporate budget liquidation plan into HSP planning process and spend down set-aside funds in a timely manner.

Occupant Protection Performance Goals

- (1) Encourage consistent safety belt use and correct child passenger safety equipment use for all occupants of motor vehicles on Wisconsin roadways.
- (2) Increase statewide average safety belt use to 76% by 2006, 81% by 2008 and 83% by 2010.

OP Performance Measures

- Observed statewide average belt use and child safety seat use will increase to 76% in 2006.
- Percent of killed or A-injured vehicle occupants who were not belted will decrease to 34% in 2006.
- Number of persons ejected or partially ejected from passenger vehicles will decrease to 980 in 2006.
- Number of students certified in the correct installation of child safety seats will increase by 75 in 2006.

Alcohol Program Performance Goal

Decrease the number of deaths resulting from alcohol and drug related motor vehicle crashes to 300 deaths by 2008.

AL Performance Measures

- Alcohol and drug-related motor vehicle crashes will decrease to 8,750 in 2006 and 8,600 in 2008.
- Resulting deaths and incapacitating injuries will decrease to 1,357 in 2006 and 1,257 in 2008.
- The proportion of all fatal crashes that are alcohol or drug related will decrease to 35% of all crashes in 2006 and 30% in 2008.

Youth Alcohol Performance Goal

Decrease the number of 15 to 24 year old drivers and passengers killed in motor vehicle crashes to 193 by 2008.

YA Performance Measures

- 15 to 24 year old drivers and passengers killed or seriously injured in all will decrease to 1,409 in 2006 and 1,239 in 2008.
- 20 to 24 year old drinking drivers in crashes will decrease to 1,748 in 2006 and 1,223 in 2008.
- The availability of alcohol to underage drinkers will decrease as a result of 300 compliance checks in 2006 and 400 in 2008.

Police Traffic Services Performance Goal

Decrease the number of people killed in speed or driver aggression-related crashes to 230 by end of CY2008 by encouraging stepped-up, targeted traffic enforcement programs and by supporting training and technology resources for traffic law enforcement.

PT Performance Measures:

- Speed-related crashes will decrease to 18,971 by end of CY2006, 18,022 by end of CY2008 and 17,121 by end of CY2010.
- The number killed or incapacitated in these crashes will decrease to 1,605 by end of CY 2006, 1,546 by end of CY2008, and to 1,489 by end of CY2009.
- Perception of risk of being ticketed for a speed violation will increase to the extent that speed drops from the second most common driver contributing cause of crashes to 10% of driver contributing cause of crashes.

Traffic Records Performance Goal

Implement a statewide integrated data collection system to allow for comprehensive analysis of all traffic crashes and thus improve the timeliness, accuracy, and completeness of transportation safety information.

TR Performance Measures

- The Traffic Records Coordinating Committee's Strategic Plan will be used to ensure that proper steps are being taken to implement a statewide integrated data collection network available for highway safety stakeholders.
- Surveys will be completed and program baselines will be established or updated.

Emergency Medical Response Performance Goal

Improve traffic crash survivability and injury outcome by improving the availability, timeliness and quality of EMS response, especially in high-risk rural areas of the state.

EM Performance Measures

- Injury to death ratios in targeted rural portions of the state will improve and state average injury to death ratio will improve to 85 to 1 by 2008.
- Response times for rural EMS to arrive at the scene of a motor vehicle crash will improve.

- Safety belt use rate in rural media markets and use rate in personal injury and fatal crashes will increase to 78% by 2008.
- Number of EMT's recruited and retained in rural areas will increase as a result of funded materials.

Motorcycle Safety Performance Goal

Decrease motorcycle rider fatalities to 75 in 2008.

MC Performance Measures

- Motorcycle crashes will decrease to 2,340 in 2006 and 2,180 in 2008.
- Motorcycle riders killed or injured will decrease to 730 in 2006 and 680 in 2008.
- Motorcycle crashes in which the rider had been drinking will decrease to 270 in 2006 and 230 in 2008.
- Alcohol-related motorcycle rider fatalities will decrease to 28 in 2006 and 24 in 2008.
- The percent of improperly licensed riders involved in crashes will decrease from 24% in 2003 to 21% in 2006 and 17% in 2008.

Pedestrian/Bicycle Safety Performance Goals

- (1) Decrease pedestrian fatalities to 50 by 2008.
- (2) Decrease bicyclist fatalities to 10 by 2008

PS Performance Measures

- Pedestrian-motor vehicle crashes will decrease to 1230 (10%) by 2006 and 1160 (15%) by 2008.
- Combined fatalities (K) and serious (A) injuries will decrease to 300 by 2006; 275 K-A injuries by 2008; and to 250 K-A injuries by 2010.
- Pedestrian injuries will decrease to 1200 (10%) by 2006 and 1,135 (15%) by 2008.
- Bicycle-motor vehicle crashes will decrease to 1040 (10%) by 2006
- Combined bicyclist fatalities (K) and serious (A) injuries will decrease to 140 by 2006, 75 K-A injuries by 2008 and to 50 K-A injuries by 2010.
- Bicyclist injuries will decrease to 1,000 (10%) by 2006

Community Program Performance Goal:

Increase local participation in state-administered and locally developed highway safety activities.

CP Performance Measures

- BOTS staff will attend 90% of the County/City Traffic Safety Commission meetings scheduled in the 72 counties and City of Milwaukee
- BOTS staff will monitor 100% of law enforcement and other contracts entered into with local units of government.

Large Truck Performance Goal

Decrease large truck-related deaths to 95 by 2008.

Large Truck Performance Measures

- Large truck-related crashes will decrease from the 5-year (1999-2003) average of 8,688 to 7,600 by 2006 and 7,400 by 2008, by performing activities that influence driver behavior.
- Combined fatalities (k) and serious (A) injuries will decrease to 470 by 2006; 450 K-A injuries by 2008; and to 430 K-A injuries by 2010.
- 35,000 MCSAP inspections with at least 40% (14,000) of inspections done on rural roads, bypass routes, high crash areas and other mobile locations as experience or data directs; at least 90% (18,900) of fixed facility inspections shall be comprehensive inspections
- An educational component will be part of every inspection and audit.
- Targeted traffic enforcement that targets violations of the truck driver and drivers of vehicles driving near them will be stepped up.
- Improved data capture and transmission:

 Phase 1 to begin implementing wireless technologies to transfer motor carrier inspection data directly from the field to State and Federal databases.
